Introducing...

# The Commercial Sleep PPO for Transportation —National Network.

Established as a partnership between SLEEP ACCESS, LLC & The MED GROUP, The Commercial Sleep PPO for Transportation Network offers employees who suffer from obstructive sleep apnea (OSA) the ability to be screened, tested, scored and treated according to best practices processes, enabled through GOMEDEDGE™ technology.

The National Network consists of Providers that include:

- Accredited Sleep Labs
- Board Certified Sleep Medicine Specialists
- Accredited HME Providers
- Health Benefits Management Consultants who work with Employers that require sleep apnea disease management and fatigue prevention solutions, designed specifically for Transportation, to treat independent owner/operators & employee/drivers.

As the only National Network serving Transportation today, The Commercial Sleep PPO for Transportation serves employees from Spokane to Atlantic City and everywhere in between— with the highest-quality processes, policies and Providers in the industry.

## How the Network Delivers Value for Employers.

Through secure GOMEDEDGE™ technology, dispatchers refer high risk drivers for PSG processing, based on route locations and dates.

With the completion of a PSG by an accredited Sleep Lab, the Network's scoring facility and Physicians enter the CPAP need assessment to schedule fitting of the CPAP device by a qualified HME Provider within 24 hours.

*The process produces minimal downtime with maximum benefit!*

Best of all, dispatchers and company administrators are notified in real-time of status, order completion, and any compliance issues experienced during the monitoring period.

## How the Network Delivers Value for Sleep Labs & HME Providers.

With online tools that pre-determine risk and limit downtime, the Network's value, its processes and its Sleep Lab and HME Providers are promoted to targeted Employers.

Driver referral notifications are submitted via secure email to a Provider's in-box. With a 10+ day average lead time, Providers can accept the referral and schedule the participant without having to flex around a demanding time-frame. Once the test has been completed, the Sleep Lab can upload the PSG data to the Network's Scoring Facility.

With a successful upload, their work is done! Month-end activity reports are generated and a check is issued the first week of the following month.

To become a participating Sleep Lab or HME Provider in The Commercial Sleep PPO for Transportation Network, contact The MED Group:
